## About Me

---

I am a passionate Computer Science student with a strong interest in Artificial Intelligence, Deep Learning, and Neural Networks. I have worked on Data Analysis and Machine Learning projects where I gained hands-on experience in data preprocessing, visualization, and model building. My learning journey includes working with Python libraries for analytics and developing intelligent systems using modern AI techniques.

## Skills

---

- ✦ **Programming languages:** Python, C++
- ✦ **Technologies/Frameworks:** Pandas, NumPy, Hugging Face Transformers, PyTorch, TensorFlow
- ✦ Exploratory Data Analysis (EDA), Seaborn, TensorFlow, Streamlit
- ✦ **DataBase:** SQL, MYSQL, PostgreSQL,
- ✦ **Other Tools:** Git, GitHub, Excel (Advanced), Jupyter Notebook, Google Colab
- Other Skills:** Statistical Analysis, Data Modeling, KPI Tracking, Dashboarding

## Projects

---

- ✦ **Movie Recommendation System**
  - Built a movie recommendation web app using FastAPI, Streamlit, TMDB API, and Machine Learning
  - Applied cosine similarity algorithm to recommend movies based on content similarity
  - Integrated TMDB API to display movie posters and details dynamically
  - Developed backend APIs with FastAPI and frontend interface using Streamlit
- ✦ **Application Performance Dashboard**
  - Built a data-driven dashboard to track system metrics and user activity
  - Used Python (Pandas, Matplotlib) for data preprocessing and visualization
  - Improved monitoring efficiency by consolidating multiple data points into a single interface
- ✦ **Customer Segmentation Analysis**
  - Applied data analysis techniques to segment customers based on purchasing behavior
  - Identified high-value customer groups using clustering-based insights
  - Provided actionable recommendations for targeted marketing strategies

## Experience

---

- ✦ **Application Service Intern**  
WAISL Digital | July 2025
  - Developed an interactive dashboard to monitor application performance metrics, improving visibility of key KPIs
  - Processed and cleaned structured datasets using Python (Pandas), reducing data inconsistencies
  - Designed visual reports to support faster decision-making for internal stakeholders
  - Automated repetitive data handling tasks, improving reporting efficiency

## Education

---

**Guru Gobind Singh Indraprastha University (GGSIPU) – GTB4CEC**  
Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE)  
August 2023– July 2027  
New Delhi

CGPA: 8.66
